

HYDRO-TRIP SUB

HTS-HYDRO TRIP SUB

It is used to temporary plug the tubing string with the use of a setting ball. The sub is installed below a hydraulically actuated tool to provide a method of applying tubing pressure required to activate the tool. The setting ball moves through the Hydro-Trip sub after a pre-determined shear is applied leaving the tool open for production. Premium threads available when ordering.

SPECIAL FEATURES

- Standard EU 8 RD connections, premium connections available upon request
- Permits full circulation before dropping ball

Tubing Size in. (mm)	Max.O.D. In. (mm)	Min.I.D. In. (mm)	Thread Connection
2.375 60.33	3.000 76.20	1.906 48.41	2.375" EU 8 RD
