

SHIELD-STC TUBING CENTRALIZER

Model STC Tubing Centralizer is used to center the tubing and provide easier entry into an PCRW Cement Retainer previously set by wireline. It is made up above the stinger seal assembly and provides a centering device for entering the retainer bore.

SPECIAL FEATURES

- Provides positive control and allows one size
- Tubing centralizer covers a large range of casing weights
- Most parts are interchangeable with the SSP Mechanical Setting Tool
- Allows tubing torque to be transmitted to tools below
- Can run with Baker Cement Retainers
