

## Disolvable MSF Pump-Down Dart

Innovative MSF Activation and isolation device. significantly improve multi-stage frac completion design, installation and operation. reduce overall cost of completion, simplify intervention and ease stimulation operation compared with other existing systems.

### SPECIAL FEATURES

- Allows for casing tests prior any wellbore operations
- Used as an initiation point for fracturing operations
- Large exit flow ports for minimal flow restriction
- Hydro-static casing pressure operation
- Large bore ID for standard cement wipe plug use.
